How to Band Your Horse's Mane

- 1) Spray Quick Braid, spritz a 2" section of mane with the training spray, starting at the bridle path. Next, separate out a ½ inch section of hair.
- 2) Pull the ½" section thru a band holding the hair as close to the neck as possible, wrap the band around the hair sections several times until tight, twisting the band after each loop keeping the hair in the same hand.
- 3) Go on to the next section of mane and separate out another ½" section of mane. Repeat the banding procedure.
- 4) When you are completely finished, tighten the bands and then trim the excess length off the mane.
- 5) If you are banding the day prior to your show, use a slinky to keep the mane free of shavings and clean.
